Redux / Rtk	Intermediate	▬▬▬
TypeScript	Beginner	▬▬

ACHIEVEMENTS

React Native Chat-App

Fully functioning Android chat app with advanced features such as user authentication, push notifications, animations and flexible design. ⌄

Dynamic React-Redux Calculator

Re-creation of the Windows calculator's logic with agile calculation flow using React useStates and Redux Toolkit as state management. ⌄

Vanilla JS Personal Portfolio Page

Dynamic portfolio web-page that compiles all of my signature projects whilst applying new features such as lazy embedding and pop-state event manipulation. ⌄

In progress: First client project

Built and design of a React webpage for a tattoo studio, including a fully automated booking system.

EDUCATION

The Complete 2022 Web Development Bootcamp

2021 - 2022   Udemy Inc.

In-depht theory paired with practical projects to gain a strong foundational skill set.

L5 Management and leadership in healthcare

2019 - 2020   Highfield Qualifications

Credit-based diploma focusing on Leadership & Management within a health and social care setting

SUMMARY

7+ years of experience in the healthcare sector with degree based education and managing private care institutions. Self-trained web developer with 4 years project-based practice in website and app creation. Active curiosity for tech, coding and complex data challenges, striving for new work responsibilities that align with my passion.

DEVELOPMENT EXPERIENCE

After finishing the *Udemy Complete Web Development Bootcamp* ⌄, I started working on own projects to build up my practical expertise. I kicked off with a *React* project with a *Firebase* backend covering multiple authentication options, including OTP text confirmation, then transitioned to building a portfolio page, practicing *CSS*, *JS* selectors, and DOM-manipulation. I further enriched my scope by completing two fundamental courses on *TypeScript* and *Redux*, which then helped me create a calculator using *React* and *RTK*. Early this year, I finished my (so far) most complex project: A *React Native* real-time chat app with authentication, user settings, and push notifications. Recently, I started working on my first client project, designing and optimising the website of a tattoo artist using *React* and integrating an automated booking system.

WORK EXPERIENCE

Rota Coordinator   2023 - Present
Doctorcareanywhere.com   London
- Managing and monitoring the workforce using a combination of management tools such as Quinyx, Dynamics, Jira, and PowerBI
- Team management and task coordination using a complex Miro board

SKILLS

Analytical thinking ·

Project management · Eye for detail ·

Flexibility and adoption ·

Problem-solving · "Lets do it" mentality ·

Complex task coordination

WORK EXPERIENCE

Field Care Supervisor
2018 - 2019

Caremark   London

- Monitor, supervise and mentor all care and support workers
- Facilitate practical inductions of all new care and support workers
- Assessment of individual client needs and potential risks
- Onboarding and training of staff
- Emotional and practical support to individuals and their families
- Be on-call in case of an emergency

Various Positions
2012 - 2018

N/a   London

The decision and execution in moving to the United Kingdom came with multiple challenges, particularly in regards to language and transferable skills and education. So I set foot in this new country by trying a variety of generic service and logistical jobs, such as working as a shop assistant, gardener, support worker and many more.

School Teacher
2010 - 2011

Damjanich J Primary School   Hungary

- Teaching art in the 5th and 6th grade classes
- Organizing exercises of day-border students
- Organization and execution of school events
- Pedagogical support and advise for children as well as parents
- Creative working training

PASSIONS

- Software / hardware news
- Photography
- Music
- Science
- Astronomy
- Martial arts
- Longboarding
